

## **ICT Technician / Network Manager**

AMS IT Systems are looking to recruit an experienced ICT Technician to carry out a wide and varied role in the company.

The successful employee will work 3 days per week in a local Primary School, carrying out all tasks involved with network management, including trouble-shooting, problem solving, installation of hardware and software and also some time working with groups of children in a classroom environment whilst using ICT equipment.

The remaining 2 days per week will be spent working with AMS IT Systems on a wide range of projects including internal support and also first line support for clients in the local area. This will also include fault finding and fixing, installation of hardware, software, network infrastructure, CCTV systems, telephone systems, broadband solutions etc. The employee will need to be flexible to meet the needs of the business.

Visits by applicants to the school are welcomed prior to interview.

**This post is subject to receipt of a satisfactory Enhanced Disclosure from the Criminal Records bureau to permit employment within the school environment.**

Salary negotiable based on experience.
